**PROJECT ACRONYM AND TITLE:** Digitalising Logistics processes (DigLogs)

**FUNDING PROGRAMME:** Interreg HR-ITA

**PERSON RESPONSIBLE:** Edvard Tijan, PhD, Associate Professor

## FINANCIAL DATA

| Project total cost | Overall funding assigned to PFRI |
|---|---|
| € 2.555.427,50 | € 307.375,00 |

## SUMMARY

The DigLogs project involves cooperation between the two countries - Italy and Croatia, and is being implemented with the aim of creating the necessary concepts, technological solutions, models and planning to establish the most advanced digitized logistic processes for multimodal freight traffic and passenger services in the program area. The project is aimed at developing key implementation plans to increase the competitiveness of multimodal transport services and harmonize passenger services.

The main activities of the project are:

• Analysis of the main sector innovations focusing on the trend of digitization of the process in the program area and managing the data for mobility of cargo and passengers

• Development of a travel map based on major innovations over the next five years

• Defining the steps to be taken to implement innovative solutions

• Seven pilot-focused cargo, passenger and combined pilot implementation to test the real situation in private and public management

• A plan of transfer so that the pilots can understand the results by future participants in the program area

• An action plan for the collection of experience and results and for sending all the measures that have to be taken to support the digitalization process after the closure of the project

| Start date | End date |
