SUMMARY

The ADRIREEF project combines innovative activities with the potential of socio-economic influence from activities such as aquaculture and tourism. The project will include setting up and testing of suitable technologies that have little impact on the underwater world.

ADRIREEF aims to explore the reef potential in the Adriatic Sea in order to strengthen the blue economy.

The main activities of the project are:

- Define the current state of the Adriatic reefs in the area of program with classification of the existing ones
- Innovative integrated systems for monitoring abiotic and biotic descriptors through the adoption of technologies with low environmental impacts
- Develop guidelines for participants and the White Book for economic and sustainable exploitation of reefs
- increase employment with Italian and Croatian citizens
- testing of innovative integrated monitoring systems with low environmental impact
