

## University of Rijeka, Faculty of Maritime studies

**PROJECT ACRONYM AND TITLE:** The complex multiplicative effects of sea ports and their impact on the economy

**FUNDING PROGRAMME:** Scientific project of the Faculty of Maritime Studies Rijeka

**PERSON RESPONSIBLE:** Izv. prof. dr. sc. Alen Jugović

### FINANCIAL DATA

Project total cost	Overall funding assigned to PFRI
31.570,00 HRK	31.570,00 HRK

### SUMMARY

The study of the complex multiplicative effects of the sea ports and their impact on the economy is related to the effects of the port activity within the national economy.

The aim of the research is to point to the significance of the seaports, i.e. the relationship between the activities of the seaports and the surrounding environment and to measure them. The project will produce results that will point to the importance of sea ports for the region and the overall economy.

The research will create suggestions for port development and at the same time the development of the area in which the port exists. Conclusions, recommendations and the application of results will enable ports to view their own business from another perspective and to think about modifying their business and investing in development.

Start date	End date
